

Dear Parents / Guardians:

This is a joint message from The Delta School District and Delta Police:

It has come to our attention that drugs found in the possession of a student in a Delta school were found to test positive for Fentanyl. These pills were purchased illicitly as Xanax, and contained Fentanyl. This is extremely concerning information and as such, we felt it was essential to share this with our parent and extended community.

The Delta School District is working closely with the Delta Police Department as they investigate. In the interim, we cannot stress enough the importance of talking to your child about the life-threatening risks associated with taking illegal drugs.

In addition, if you or your child notices any suspicious activity in your neighborhood or at your school, please report it immediately to the Delta Police or your school principal.

If you, or your child, have any information related to the trafficking of any illegal substances, please contact the Delta Police at 604-946-4411.

Attached is an information bulletin with more detailed information on Xanax.
