

Altaf Mascati, Director of Employee Services

The core work of the Employee Services department is to recruit and retain highly skilled employees for the Delta School District. Our focus is on hiring a diverse workforce who actively support our Vision for 2030. And once hired, we support the work of all departments to ensure that our employees have the appropriate skills and training necessary to thrive in their work. We achieve this by building capacity through professional learning and leadership development.

Finally, it is imperative that we create healthy workplaces for our staff. To this end, we are in the process of developing a plan for employee wellness that will promote three foundational elements including employee health, positive workspaces and system support. We know that when our employees are well and thriving in their work, we will all achieve great things.
